

Review Questions 7

Your Name:

Please print out this form (two-sided, if you can) and write your answers *legibly* in the spaces provided. If you can't write legibly, type.

1. When using the RLI to control an experimental network in ONL, you are required to setup an SSH tunnel. Explain what the tunnel does in this context.

2. On a *unix* or *linux* system, use the *man* command to lookup the *netstat* command. Explain what it does. Run *netstat* (you may need to type */sbin/netstat* or */usr/sbin/netstat*) and show one line of its output below. Explain the information contained on this line.
